- Building a long term fruitful partnerships with all company's stakeholder

greetings

"The roots of our paper businesses in Indonesia were first planted in 1973 with PT Surabaya Mekabox, SMB Group, founded by my father, Mr Suparsono. As the founder, he always believed in putting customers needs as priority by continually raising the standard of quality products and services that we offer. In more than five decades' of growth and consolidation, we came into existence today as a prominent paper producer in Indonesia. Through PT Global Base Universal (GBU), we are expanding from brown and tissue paper business into energy supply, construction materials, plastic, property, and forestry.

Each of our company has been unwavering in its dedication to its business regardless of the ups and downs in the industry and the overall economy. We continue to gear up for the opportunities by optimizing the product mix, building up sales channels, improving the product quality, promoting and upgrading our businesses. We will stay alert and be confident in overcoming difficulties as we strive for a greater market share and scale new heights in a more centralized management system, economies of scale, diversification and internationalization with the solid ground of our expertise. For our main paper business division especially, we will work for the opportunities both upstream, into providing sustainable raw material resources such as pulp, to downstream, where our companies create diverse value-added consumer products.

Our key value drivers include developing positions that offer growth opportunities, investing in our exceptional people, and maintaining a competitive sustainable cost advantage across our diverse business entities. We are confident that we will remain well positioned with a strong platform for growth. Our growth has been satisfying because we have focused on our clients' needs and becoming partners to grow together. We have been working hard and will continue to pursue our goals and missions in every division. I am proud of each company in our group, we will work harder to forge ahead with processes and believe that the market is still full of opportunities. We are all geared up to develop the group with a new global vision in order to advance companies' development. With our uniqueness, we will continue to make great strides in a steady business expansion and remain in the forefront of the industry.

Dermawan Suparsono
Chairman

Our founder, Mr. Suparsono and his wife, Mrs. Lindratini, has ventured from paper to the hospitality industry by managing hotel resorts and entertainment. Subsequently, Mr. Dermawan co-founded SPS Corporate, which began with PT. Sapanusa, an export oriented tissue paper manufacturer. We have now expanding our businesses to construction, property, energy, forestry, paper and packaging industry. Mr. Dermawan, as the Chairman of SPS Corporate, effectively transformed the business from a family-owned enterprise into a professional and transparent management system. Throughout these years, SPS Corporate has achieved another milestones.

1st Largest Lightweight Brick Manufacturer in Indonesia

PT. Superior Prima Sukses (Blesscon)

2nd Largest Tissue Paper Manufacturer in South East Asia

PT. Sun Paper Source and PT. Sapanusa Tissue & Packaging Saranasukses

3rd Largest Brown Paper Manufacturer in Indonesia

PRODUCTS

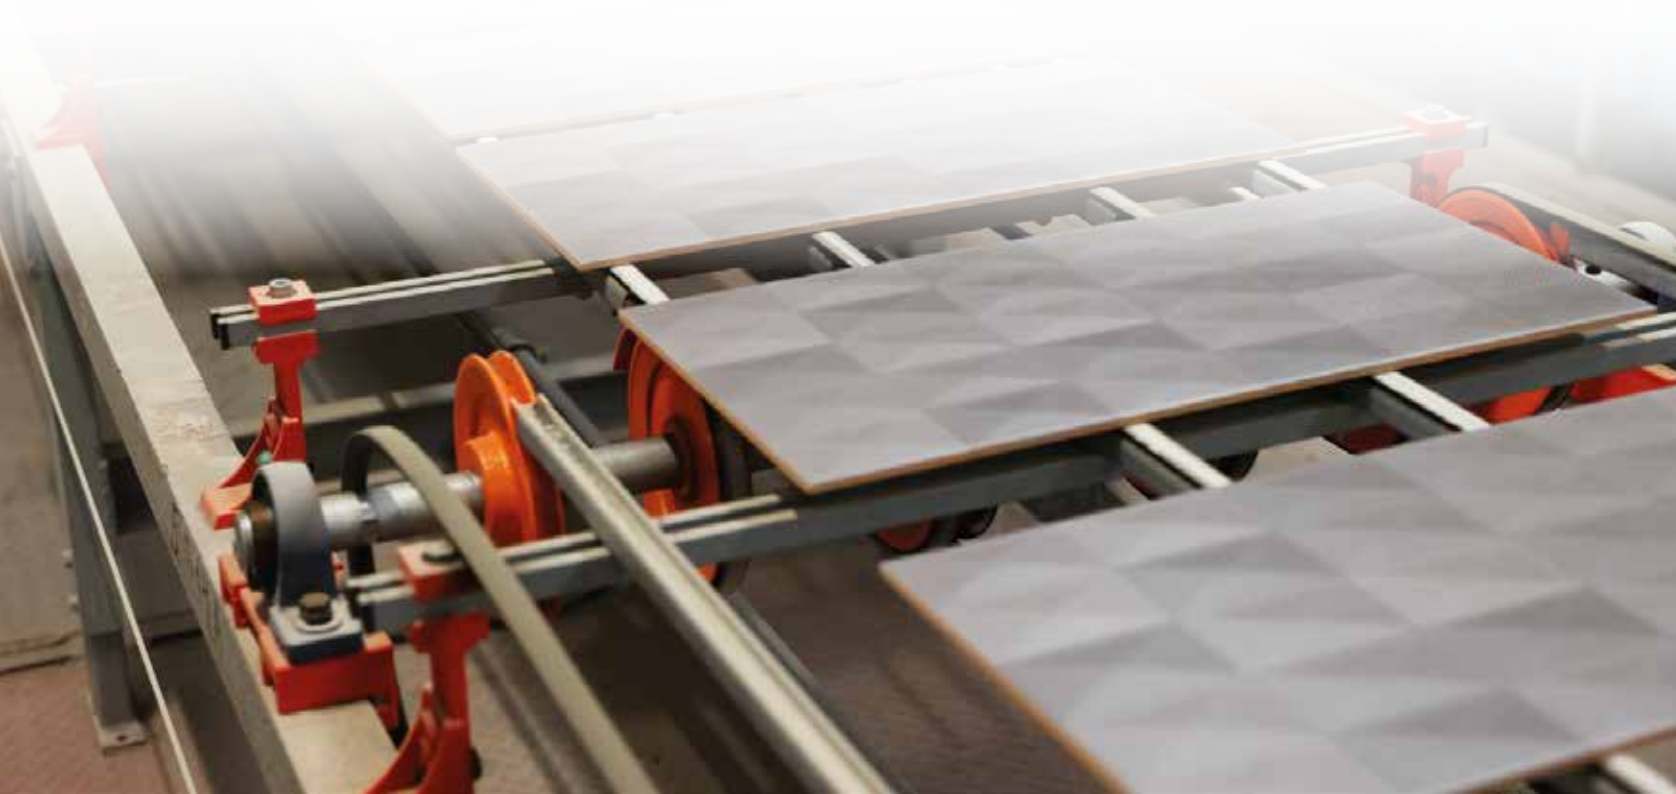

Homogeneous Tile

Homogeneous tile is a type of ceramic consisting of a single layer, from the bottom to the top. This type of ceramic has the following advantages:

- High Density: It can last a long time because its water absorption rate is low.
- Easy Maintenance: Our homogeneous tile is not prone to visible cracks. If there is an impact or broken item on the floor, there will be no visible cracks or scratches. This is great for maintaining the quality of the interior appearance of your home.
- Stronger: It can withstand the weight of many people.

Glazed Porcelain Tile

Glazed porcelain tiles have the same advantages as homogeneous tiles, but can be patterned, colored, or even textured. Glazed porcelain tiles are produced with two layers. The first layer has a thin layer applied on top like glaze on ceramics. Meanwhile, the second layer is made of homogeneous tiles.

PT Surabaya Mekabox began its first corrugated carton box factory in 1973. The company core competence as having an integrated facility with strong foundation and proven experience for four decades have made it one of the leader in paper packaging industry. Today, we are equipped with 3 corrugators and 10 flexo lines with a total capacity of 12,500 mT/mth in 5 hectares of land.

The corrugated carton box is fully supported by its own 4 paper mills that resides in 22 hectares of land to produce approximately 20,000 mT/month of white and brown kraft liner/test liner, fluting medium paper, chip and core board. The company is certified for the use of 100% recycled paper to support the commitment of environment sustainability, FSC Certified with proper waste water treatment plant and ISO 9001 : 2015, ISO 14001 : 2015 management certification.

Vision:

To be the preferred integrated environmentally friendly recycle based paper packaging manufacturer.

Mission:

To implement an operational strategy that views the packaging industry as an integrated process in order to achieve our business partners' objectives at a reasonable cost.

PT Mekabox International is strategically located at Sebani, Tanggulangrejo Village, Ngoro, Mojokerto about 50 km from South of Surabaya in East Java province, where the country's various manufacturers are based.

The production was in April 2015 with annual paper production capacity at 140,000 mT/year of high performance test liner and corrugating medium with grammature ranges from 125-275 gsm. A state of technology and a newly installed 3,600 mm paper machine, equipped with shoe press, size press, and soft calendar. The factory currently occupies a land area of 19 hectares with ample surrounding areas which may give sufficient space for future development.

PT Mekabox International is known for its progressive approach to business and environmental sustainability. With over 30 years of experience in the paper industry, we take pride in producing 100% recycled paper using our own self-sufficient power plant. Our commitment to environmental protection is reflected in our significant investments in eco-friendly facilities to reduce our impact on the environment. Additionally, we actively support various community initiatives and participate in poverty and relief programs.

"We aim to be a world class paper manufacturer by capitalizing opportunities and demands which generates value and quality for the mutual benefits through responsible sources".

PT Supreme Paper Solution is one of the leading brown paper manufacture located in Subang, West Java. Our mill has capacity of 360,000 mT/year of high quality test liner and corrugating medium with grammature range from 125-275 gsm. We are committed to sustainability and use 100% selected recycled paper for our production, which benefits the local economy by reducing landfill waste and supporting recycling process.

One step forward, PT Supreme Paper Solution recognize the Forest Stewardship Council (FSC) as acknowledgement that our materials come from responsibly managed source that provide environmental, social and economic benefits to all stakeholders.

Products

Corrugating Medium Paper

Our high-quality corrugating medium paper comes in a range of 125-275 gsm, ensuring you have the flexibility to choose the thickness that best suits your requirements. Our corrugating medium paper is designed to provide exceptional strength and durability, making it the ideal choice for heavy-duty packaging applications.

Test Liner Paper

Our test liner paper is a versatile and durable material, ideal for manufacturing corrugated cardboard boxes. It has a natural brown color, reflecting the recycled fibers used in its production. Despite being made from recycled materials, our paper maintains its strength and stiffness, providing excellent protection for the packaged goods with surface weights ranging from 125-275 gsm.

PT Life Industrial First Estate established in 2013 to pioneer the group property establishment in East Java. With the dense population, booming economy and the recent infrastructure, roads, and other development, the progress of East Java is very promising. Demand for housing as well as commercial usage have been growing steadily; and therefore to capture this opportunity, LIFE was established.

Supported by reputable marketing agents to assist in the sales, we also have experienced and talented young professionals as our team in property development. Our services include all, from marketing, managing and running business operation, from drafting, designing to servicing buyers.

PROJECT

The company has acquired hundreds of hectares in Lamongan, East Java preparing for the new port-based industrial estate project which hopefully will be a very prominent and strategic integrated port, warehouse and industrial estate in East Java. We have already had a successful experience with the Public Private Partnership (PPP) framework in the form of the Lamongan integrated Shore and the Lamongan Port expansion project, one of the identified masterplan listed by government in which to capture.

PT Sentra Pertanian Sumbawa is a company engaged in agriculture, forestry, industrial wood utilization, and cassava processing industries. We have obtained a forest utilization business license (PBPH) as a land concession in the West Nusa Tenggara Province, covering an area of approximately 8,500 hectares.

We committed to sustainable land management by preserving approximately 1,200 hectares of the concession area as natural forest. The cassava crop will be planted on approximately 4,300 hectares of the concession area, producing around 250,000 tons of cassava. This will be processed into tapioca flour, which yields approximately 62,500 tons annually or 170 tons per day.

During the tapioca flour production process, there will be waste in the form of cassava residue and wastewater from the cassava washing process, which can be utilized. The cassava residue can be used as feed for livestock, while the wastewater contains biogas that can be used as a source of electricity generation. Around 3,000 hectares of land will be planted with Eucalyptus sp and Acacia mangium trees for the production of pulp and wood chips.

Our Products:

- Cassava
- Tapioca flour/starch
- Animal feed
- Biogas
- Pulp
- Wood chips

SPS Foundation was established in May 2013 as part of a corporate social responsibility initiative to address social and humanitarian issues based on the love of Christ. The foundation seeks to provide proper moral, spiritual, and academic education to underprivileged Indonesian children for their future.

In 2014, SPS Foundation established SMK Kristen Harapan Sejati (a vocational christian high school) in the West of Surabaya to offer majors in Institutional Financial Accounting, Industrial Electronics Engineering and Industrial Mechanical Engineering. The facility provides complimentary education, including tuition and building fees, computer and language practical curriculum, work practices in associated companies, and additional tutoring.

Additionally, the foundation seeks to provide community healthcare to those in need through some of its faithful missionaries. Its current programs include elementary schools for over 648 underprivileged children, as well as health-related services such as free cataract operations, blood tests, and free medicine for health problems to the surrounding community. The foundation supports remote areas across Indonesia, including Papua, Kalimantan, and East Nusa Tenggara (Kupang).

OUR PROGRAM :

SMK KRISTEN HARAPAN SEJATI

**PRAKTEK DOKTER BERSAMA
(GENERAL PRACTITIONER & DENTIST)**

SPS Foundation focus is to assist and to share love to those who needs, especially in the area of education & health care. We care for those who are neglected or abandoned especially for the children and elderly

Vision:

Devoted to channel the love of God to the underprivileged community or to those in financial borderline

Mission:

In The Education Field

To elevate Indonesian students skills, moral, and intellectual matters in order to form competent and sound individuals

In The Social Field

To support those in needs of health care facility in the community and to assist the advancement of the community welfare in general
